3.90.1 General

1.1 Existing Structures

3.90.1 General

1.1 Existing Structures

The Federal Highway Administration and the States have established a goal that the LRFD standards be used on all **new** bridge designs after 2007. The 17th Edition of the AASHTO Standard Specifications for Highway Bridges and MoDOT's LFD Bridge Manual **may** be used for the maintenance and rehabilitation of existing structures or the widening of existing structures that were originally designed using Load Factor Design.
